DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bohm et al (US Patent 5,230,940) in view of Beggs et al (US Patent 4,384,020).

Bohm discloses a process and system for forming textile materials. As shown in the figures, latex layer 3, barrier layer 4 and backcoating 5 are applied to one side of layer 1 and tufts 2 are applied to the other to form a noise absorbing carpet. Various materials may be employed in the latex, barrier and backcoating layers (see col. 2, line 3 through col. 4, line 58 and examples 1-2).

However, Bohm does not disclose perforating the backing later in the manner claimed by the applicant. Regarding this difference, the applicant is directed to the reference of Beggs.

Beggs discloses a noise attenuating structure. As shown in Fig. 1, the structure 8 comprises facing sheet 14 with a plurality of perforations 18 formed therethrough. It would have been obvious to one having ordinary skill in the art to employ a plurality of perforations in a sheet material, as taught by Beggs, in the process and system of Bohm in order to improve noise attenuation. In addition, without the disclosure of unexpected results, it is the examiner's position that the specific perforating and

bonding techniques claimed by the applicant are well known and conventional in the art and would have been obvious to employ in the process and system of Bohm in order to facilitate production of the textile materials.

Response to Arguments

3. Applicant's arguments filed April 12, 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to applicant's argument that Beggs et al is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, it is the examiner's position that Beggs is at least reasonably pertinent to the particular problem with which the applicant was concerned. Therefore applicant's argument is believed to be incorrect in this instance.

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
